

**NEWCASTLE.**

**SYNOD OF AUSTRALIA.**  
A DEPUTATION from the above religious body, consisting of the Moderator (Rev. T. Craig), Clerk of Synod (Rev. James Miller), Rev. Dr. Fullerton, Rev. John Dougan, ministers; with Hon. John Macfarlane, M.L.C., and Mr. James Howison, elders, waited upon his Excellency the Governor to present the following address for transmission to her Majesty on occasion of the marriage of his Royal Highness the Prince of Wales to the Princess Alexandra.

The Governor graciously received the deputation, and promised to forward the address per next mail to the Duke of Newcastle, Secretary for the Colonies.

To the Queen's Most Excellent Majesty.

May it please your Majesty.—We, on behalf of the Ministers and Elders of the Synod of Australia, in connection with the Established Church of Scotland, take advantage of the recent auspicious marriage of His Royal Highness the Duke of Gloucester and the Duchess of Kent, to present to your Majesty the following address:

We humbly tender our assurance that your Majesty's vast dominions have no subjects more loyal than the adherents of the Synd of Australia; that, although far separated from the centre of your power, our hearts beat responsive to every throb of the great national heart of Britain, and that any event that has good promise for

We join with unfeigned heartiness in the rejoicing of your subjects, so universal and so enthusiastic, on this late auspicious occasion. We cherish the hopes excited and raise our fervent prayer to the King of Kings for their realization.

It is our fervent desire that this union between the heirs of Britain's throne and a princess of that race to which Britain owes so much of that hardy and resolute spirit that

Commanding your Majesty to the God of grace, that He may cheer, guide, and strengthen you for a continued prosperous reign, and praying that He whose blessing upon your Majesty and late illustrious Consort so endeared the

Union to the national heart, may give grace to their Royal Highnesses the Prince and Princess of Wales to follow the example so nobly set and so affectingly consecrated, we humbly subscribe ourselves, in the name of the Ministers and Elders of the Synod of Australia, in connection with the Established Church of Scotland,

THOMAS CRAIG, Moderator,  
JAMES MILLER, Clerk.

ALBERT CRICKET CLUB BALL.—The Annual Ball at

The Albert Cricket Club, which is now an event recurring with the close of each season, came off last evening, at the Masonic Hall, and resulted in similar success to that which has attended it on past occasions. The handsome hall, decorated under the superintendence of Mr. Walker, was embellished with the Danish and other national flags, intermingled with numerous emblems of cricket trimmed with the colours of the club; the walls being

also hung with festoons and wreaths of evergreen and native myrtle. The company, which began to assemble at nine o'clock, embraced many of our social notabilities, and particularly those who have always taken an active interest in the success of cricket in this colony. Dancing soon after commenced, and was kept up with spirit throughout the evening, the lively strains of Herr Appel's full band. Refreshments of an excellent quality were served in the

ante-rooms, and for those who did not dance cards were provided. The elegance of the programme was particularly noticeable, being printed in gold and blue with several tasteful devices. In the centre of the front page were the Australian arms, with the motto of the late Prince Consort, with which the symbols beneath, the whole being surmounted with a golden scroll containing the name of the club. On the back were the Prince of Wales' plume and motto.

**PUBLIC POUND.**—Bodalia has been appointed "place for establishing, erecting, and maintaining public pound."

**PETTY SESSIONS.**—Ryde has been appointed a place for holding Courts of Petty Sessions, under the Act William IV., No. 3.

**ERRATUM.**—An unintentional error occurred in our

**DENISON HOUSE.**—The domestic offices of this establishment (Messrs. Giles and Company's), in Piccadilly street, were on Thursday last—the commemoration of the marriage of the Prince of Wales with the Princess of Denmark—illuminated with three stars, and ornamented with a painting of the marriage ceremony.

painted by their ticket-writer, an "amateur." The handsome decoration was affixed to the front of the house, formerly known as Gill's Hotel, where Messrs. Giles and Company feed and sleep their young men and young women,—not "near the back entrance" Messrs. Giles and Company's stores, in George street"—as erroneously stated in our report.

Pitt-street, to audit the accounts and make final arrangements. After the payment of the several amounts voted to the charitable institutions to assist them in conveying the children from the suburbs by omnibuses and other conveyances, to enable them to be present at the procession on Thursday last, a sum was also handed over to Mr. Scott towards defraying the expenses of a grand display of fireworks, to take place on Friday evening next, at 8 o'clock. The committee

have arranged to have the Volunteer bands on the occasion. The public will be admitted free of charge to the Domain, and there is no doubt we shall see a large Friday the finest pyrotechnic exhibition ever produced in the colony. The demonstration committee have still in the hands of the treasurer a balance which will be devoted to some charitable object.

**INDUCTION OF THE REV. S. F. MACKENZIE.**—On Thursday evening last, a very interesting meeting took

place in the Free Church, West Maitland, for the purpose of inducing to the pastoral charge of the congregation the Rev. S. F. Mackenzie, late Bowenfels. The Rev. Mr. Bain opened the meeting with prayer, after which the minutes of past meetings were read and confirmed. The Rev. Mr. Sheriff ascended the pulpit, and preached an excellent discourse, at the conclusion of which the usual questions were put to Mr. Mackenzie, who having duly replied

to them all, the Rev. Mr. Sherriff gave him the right hand of fellowship, and welcomed him into the Presbytery. That ceremony being finished, Mr. Sherriff again ascended the pulpit, and delivered a most excellent address, on the duties and responsibilities of a Christian minister, at the close of which all the Presbytery gave the newly inducted pastor the right hand of fellowship in Christ. The Rev. Mr. Gordon next followed with a very able address on the duties

of the congregation towards their pastor, TAKING up his text the twelfth and thirteenth verses of St. Paul's Second Epistle to the Thessalonians. The customary devotional exercises were then engaged in, and the congregation separately gave their minister the right hand of fellowship. An address was afterwards delivered to the Gaelic portion of the assembly.

*Mailand Mercury.*

**FATAL BOAT ACCIDENT.—TWO MEN DROWNED.**

About seven o'clock on Sunday evening last, an accident occurred on the river, by which two men were drowned, and four others narrowly escaped a similar fate. Our informant tells us that seven men were going from Hexham to Ash Island in the ferry boat, the mrs. of the party being aptly at the time. When within a short distance of the shore the boat, through the unsteadiness of the men or from some other cause, filled with water and sank. The six men were consequently drowned. The ferry boat was a small one, and the accident occurred in the middle of the river.

quently left to struggle in the water. The swimmers, some from the swim ashore, and some neighbours, seeing the accident, procured a boat and went to the assistance of the others, four of whom they succeeded in saving. One was observed to sink within ten feet of the shore; another was not seen after the accident. The inhabitants of the vicinity were yesterday engaged in dragging the river to recover the bodies; but up to the time our informant (Mr. Welfare) left, the dragging operations had not been successful. With the

**NEW RUSHES.**—The new rush on the Tipperary Gully Road, is situated near Duffer Gully, and is between eight and nine miles from this township. Owing to the new rush about five hundred miners

We usually dig up water from the ground. The sinking is from thirty-five to forty-five feet. There were about one hundred holes going down and several others bottomed. The yield is from three grains to half a pennyweight to the dish, or ounce to the load, with two feet of wash dirt. The claims are pegged out for upwards of two miles. The streets have been marked out by Mr. Gold-Commissioner MacArthur. This rush is well spoken of, and from all accounts is likely to turn out a permanent

digging. The accounts from the Back Creek run near Shedy's public-house, are very satisfactory. This will, most probably, turn out a good payable gold-field. —*Durrango Star.*

At 2 o'clock.

**Important Sale of First-class Stations and Back Blocks.**

**POWER, RUTHERFORD, and CO.**  
sell by public auction, if not previously  
purchased by private contract, on **THURSDAY, the**

The undermentioned first-class squatting property via. :-

**HUNTHAWANG,**  
with a frontage of 160 miles to the south bank of the river Lachlan,  
Estimated to contain 121,000 acres, and with 2600 head  
well-bred cattle (to be mustered).

First-class improvements consisting of  
Substantial six-roomed homestead and service  
rooms, both detached, store and cellar, 8  
paddock, men's hut of five rooms, large stock  
coush of working 3000 acres of cattle, spraying  
and harness, horse-py, horse paddock, and  
well fenced; and 2000 acres of 250 acres, free  
with three rills, 50 horses, two carts and various  
household furniture and stores to be taken at a

A weanng yard and paddock has recently been put  
four miles from the station.  
"Hunthawng" is 65 miles from Booligal, and com-  
mands the Lachlan gold-fields markets, and is within  
distance of those of Victoria.  
The station is capable of carrying 7000 head of cattle  
BOTO.

Ten miles north of "Hunthswang." The above-mentioned station has a frontage of ten miles to the "Wadi" of the Billabong, adjoining Mr. Sutor's Waddi, and will be a good one, with or without stock.

It contains 64,000 acres of first-class myall and mallee country, and is estimated to carry 15,000 sheep all the round. During five months of last year 39,000 sheep running on it.

The improvements are—three-roomed house, and the outbuildings of a but, yards, etc.; a dam across the billabong; and an inexhaustible well of pure fresh water, miles back from the Billabong, capable of watering sheep.

And the following first-class—

UNSTOCKED BACK BLOCKS, in the LACHLAN NEIGHBOURHOOD AND DISTRICT.

Thirty-three (33) in number, containing on an average

The country generally consists of saltbush and grassed plains, with belts of timber, and affords every facility for the collection and storage of water by artificial means and all trials that have been made prove that good water may be obtained by sinking at moderate depths.

To stockholders in search of an outlet for their stock—to those desirous of embracing pastoral pursuits and to practical men with small capital, the above affords such a favourable opportunity of carrying out their views.

It is also worthy of note that the whole of these properties are within the proposed Riverina District or new colony north of the Murray, offering a great inducement to those desirous of profiting by the many advantages to be enjoyed.

in a purely pastoral country.

Also, at the same time and place as above, those com-  
stations in the Wimmera District, viz. —

**WESTERN ALBACUTYA.**

With seven miles frontage to the fresh water  
"Albacutya."

**GLANMIRE**  
**MUCROSS**  
**EVERGREEN**  
**KENMARE**  
**BARBISTON**

For the latter 5 there is a 14 years' lease.

With 6000 sheep of the following descriptions: —

2500 ewes, 4-tooth to full-mouthed, to lamb late June  
600 ewes, aged, to lamb late June

1000 wethers, 4-tooth  
1000 ditto, 6-tooth, to full-mouth  
500 ditto, 2-tooth  

---

3000  
The wool of last season realised 1s. 9d. per lb. in  
bourne, and the sheep are clean—no footrot or scab to  
known in the district.

The country is very fatting, and last winter sheep were run in one flock; it is also only one-third stock and the means of increasing its capabilities are simple and inexpensive, as water can be readily secured by means of dams.

The usual barn, stockyard, and necessary improvements are on the station.

Also, at the same time and place,

That fine sheep station, WALANDOO and BULLBLOCK, situate in the Billabone District.

South Wales, near Wahgunyah with  
2000 ewes, four and six tooth } To lamb

900 lambs  
135 rams

---

14,926 head.  
This is one of the best stations of its size in the ne

Also, at the same time and place.

That first-class sheep station, known as WALL  
DAD, and the lock block MANUMBA, situate  
the Billabong district, Near South Wales, near W  
gunyah, in the proposed colony of "Riviera,"  
the Wangeline Creek, with  
2000 ewes, 4 and 6-tooth } lamb in May, June,  
4980 ditto, full mouthed } August  
2100 ditto, hoggets  
2200 wethers, 4 and 6-tooth  
2100 ditto, hoggets  
510 ditto, full mouthed and aged  
909 lambs

The improvements are very good, consisting of pad of over 300 acres, six dams, ten outstation huts, saw press, drafting yards, four-roomed house, detached kitchen, store, and men's huts, and the usual station plant, horses, drays, hurdles, &c., will be found on the property.

The above is one of the best stations of its size in the district, and adjoins Mr. Band's well-known "Mohoboro Station" and Mr. Oborra's "Ebroging," and presents a opportunity to any one of moderate means of turning attention to squashing parasites.

Terms, very liberal, at sale.  
All information respecting the above to be obtained  
from the offices of the auctioneers, 123, Queen-street, where  
inspection of the plans and particulars are invited.

The Auctioneers have been favoured with instructions  
from Hugh Glass, Esq., to sell at same time and place  
undertakened freehold and leasehold squatted properties in  
Wimmera district, viz:—  
Avoca Forest, East and West,  
Having a frontage of about 15 miles to both sides of  
Avoca River, and containing 48,000 acres or thereabouts.

2091 full-mouthed fat wethers, fit for market  
1847 maiden ewes, to lamb in July  
190 maiden ewes  
1300 ewes, eight-tooth, to lamb in July  
3563 ditto, six-tooth, ditto  
1600 ditto, fattening  
3155 hoggets, about one year

116 well-bred rams.  
Total, 14,461, more or less.  
6 working-bullocks, dray, bows, yokes, and chains,  
7 saddle horses given in.  
Stores and implements at a valuation.  
The improvements are first-rate of their kind; com-  
able cottage, good garden, kitchen, store, stabling.

Woolshed, press, huts, drafting yard, cultivation paddock 25 acres, partly under crop, and 500-acre grass paddock. 8 out-station huts and yards, good cottage of 4 rooms, 1 stock and stack yards.

The station is one of the best in the district, is well watered and graminé, and could be worked advantageously with the following, or by itself:—

*Farms of Talla,  
Adjoining Townsville.*

Containing 60,000 acres, or thereabouts, with 3670 weathers—3600 nearly fit for market, the rest with no soon

1893 nine four-tooth  
2743 ewes, six-tooth to full-mouthed, to lamb in July  
1990 ewes, nearly fat  
2168 hoggets, about equal sexes  
69 rams, well bred.

Total, 12,413, more or less.

Team of six bullocks, dray, bows, yokes, and chains  
and eight saddle horses given in : sheep and

ments at a valuation. On the pre-emptive right, good three-roomed cottage, detached kitchen, main hall, store and bed room, stable, cart-shed, cow shed, grass paddock, substantially finished; cultivation paddock, 12 acres, substantial cockatoo house, half under cover; large garden, stum-fenced; sheep, and drafting yards with swing gates; swimming yard, stum-fenced and dog-proof. The supply is most ample, consisting of 3 tanks, loggows covered, containing 48,000 gallons water; large tank containing three million gallons water, or 4 years' supply; a large lake, containing more

double the last-named quantity; double the  
slatted well; six water tanks, at out-stations,

also renders them equally available as sites for first-class private dwelling-houses.

## IMPORTANT GUNNERY EXPERIMENTS AT SHOOTING RANGE.

(From the London Standard, March 19.)

One of the trials of ordnance, which will afford all the theories as to the invulnerability of our iron-clad vessels, occupied the whole of Tuesday last at Shoeburyness. The members of the Ordnance Committee, and the Lords of the Admiralty, were present, with Lord De Grey, from the War Office, and General Tulloh, Deputy Inspector of Ordnance. The members of the Ordnance Committee, were also on the ground, with Sir William Armstrong, Mr. Whitworth, Mr. Lynam, Mr. John Penn, and a great many naval and military officers, civil engineers, and others interested in the question of the invulnerability of our iron-clad vessels.

The experiments were arranged to elucidate as much as possible both points in dispute, the guns used being the old smooth-bore 68-pounder, Sir William Armstrong's 110-pounder service gun, with special steel shot, and the new 300-pounder, with special steel shot, weighing 45 lb. The 68-pounder was fired at a distance of 200 yards, and the 300-pounder at a distance of 1000 yards. The results of the experiments were as follows:—The 68-pounder, when fired at a distance of 200 yards, penetrated the iron plates of the 300-pounder, and the 300-pounder, when fired at a distance of 1000 yards, penetrated the iron plates of the 68-pounder.

The three plates against which this ponderous array of ordnance was directed, at a distance of 200 yards, were of iron, and the upper plate being 12 inches thick, the middle plate 10 inches, and the lower plate 8 inches. The 68-pounder, when fired at a distance of 200 yards, penetrated the iron plates of the 300-pounder, and the 300-pounder, when fired at a distance of 1000 yards, penetrated the iron plates of the 68-pounder.

Sir William Armstrong then fired his 300-pounder with an ordinary cast-iron round shot weighing 141 lb., with a charge of 45 lb. of powder. The terminal velocity with which this struck the iron plate, the unbacked portion was the highest attained, and was 1636 feet a second—and almost in exact proportion to its velocity was the damage it inflicted. Not only was the iron plate shattered, but the iron plate was shattered, and the iron plate was shattered.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.

escaped from the front of the target. Certainly the explosion made not the least perceptible addition to the damage already inflicted by Sir William, nor did it even set the timber on fire, though from the smoke that was seen, it was at the moment thought that it had done so. It was a pity for many reasons that the shot was directed so close to the mischief done to show that there was virtually no backing on which to show that it really did accomplish. As it was impossible to see the shot, it was not possible to see the damage it did, and it was not possible to see the damage it did.

The experiments were arranged to elucidate as much as possible both points in dispute, the guns used being the old smooth-bore 68-pounder, Sir William Armstrong's 110-pounder service gun, with special steel shot, and the new 300-pounder, with special steel shot, weighing 45 lb. The 68-pounder was fired at a distance of 200 yards, and the 300-pounder at a distance of 1000 yards.

The three plates against which this ponderous array of ordnance was directed, at a distance of 200 yards, were of iron, and the upper plate being 12 inches thick, the middle plate 10 inches, and the lower plate 8 inches. The 68-pounder, when fired at a distance of 200 yards, penetrated the iron plates of the 300-pounder, and the 300-pounder, when fired at a distance of 1000 yards, penetrated the iron plates of the 68-pounder.

Sir William Armstrong then fired his 300-pounder with an ordinary cast-iron round shot weighing 141 lb., with a charge of 45 lb. of powder. The terminal velocity with which this struck the iron plate, the unbacked portion was the highest attained, and was 1636 feet a second—and almost in exact proportion to its velocity was the damage it inflicted.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.

The next shot was fired from Sir William's 300-pounder, loaded with a conical steel shot of 296 lb. weight, and fired at a distance of 1000 yards. The tremendous missile struck with a velocity of 1298 feet a second, and the iron plate was shattered.
